

NOXCO raises the bar with the very first LTSA for emissions compliance.

We're removing the burden and responsibility of protecting & managing complex emission systems for power plants.

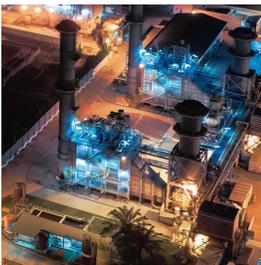

GUARANTEED EMISSIONS COMPLIANCE. NO FINE PRINT.

Going far beyond SCR management, we partner with customers to deliver integrated solutions with a complete systems guarantee for CO, NOx, and ammonia slip.

TURNKEY SOLUTIONS FOR POWER PLANT OPERATORS.

We guarantee performance with fixed priced, wrapped resources. Solutions include replacement, tuning, cleaning, proactive planning and forecasting.

MAXIMIZED SYSTEM PERFORMANCE.

With our expertise across three disciplines—catalysts, emissions, and cleaning—we bring a fully-integrated, data-driven solution. Every important decision about emissions is met with certainty and assurance through a continuous performance guarantee for the entire emissions system.

We deliver:

Cash Flow Predictability • Lifecycle Management • 100% Risk Mitigation

The NOXCO Partnership delivers the greatest value—hands down. (Nothing compares.)

Comparison of NOXCO Partnership vs Conventional Catalyst Management Plan

NOXCO Partnership	Catalyst Management Plan
Focus is Overall System Performance	Focus is Catalyst Performance
System and Catalyst Testing	Catalyst Testing
Full On-site Inspection	X
Annual Inspection/Maintenance	X
Catalyst Life Projection Based on Overall System Performance, Catalyst Tests, and Field Data	Catalyst Life Projection Based on Lab Test
INCLUDES:	INCLUDES:
✓ Catalyst Lab Testing	✓ Catalyst Lab Testing
✓ Catalyst Life Projection	✓ Catalyst Life Projection
✓ Catalyst Inspection	X
✓ System Inspection/Field Data Analysis	X
✓ Catalyst Cleaning	X
✓ Ammonia Injection Tuning	X
✓ Replacement Catalyst	X
✓ Catalyst Installation	X
✓ Catalyst Disposal	X

How it works:

1. Individual Plant Assessment

The assessment analyzes the operating parameters of a plant, plus considers local and regional emissions requirements, the evaluation of dispatch profiles and energy market opportunities, current system performance and expected remaining life.

2. Identification of Systems Opportunities

Emissions system upgrades / modifications are identified to improve compliance performance over the plant dispatch profile. Alternative catalyst options—plus a maintenance, testing and performance optimization program—are developed.

3. Setting of Emissions Performance Guarantees

NOXCO tailors guarantees for the specific business requirements of your plant, delivers a firm lifecycle cost, and provides annual maintenance, testing and adjustment to ensure long term results. System performance and cost risk is transferred to NOXCO.

NOXCO

GUARANTEED EMISSIONS.
RISK-FREE COMPLIANCE.
